

PSYCHOLOGY

A LEVEL

SUMMER ASSIGNMENT:

Welcome to Psychology Studies!

Task 1

Look up on the internet (see website below) or in a psychology textbook, a psychologist whose surname starts with the same letter as your own e.g. Begum – B. If you can't find one with that letter, go to the next letter of your surname.

<http://www.simplypsychology.org/simplypsychology-index.html>

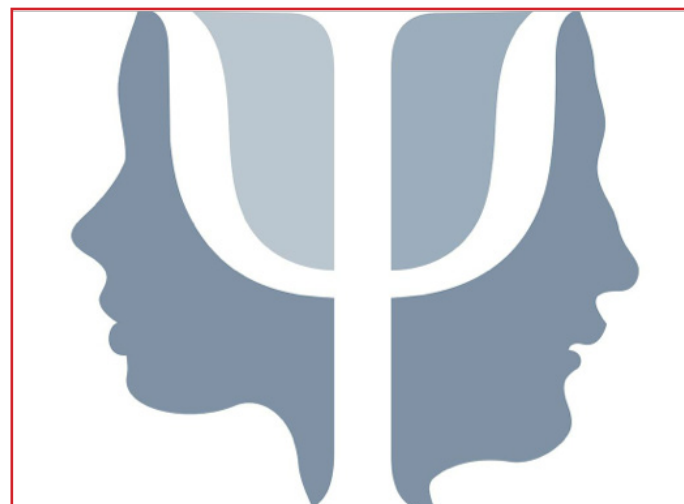

Task 2

Find a study that this psychologist has conducted.

Task 3

Write up the following from the study:

- What was the aim of the study?
- How was the study carried out?
- What were the findings of the study?
- What was good and/or bad about the study?
- What was it that you found interesting about the study?
- If you had to do some further research inspired by this study, what would this be?

This work should be typed, including images of the psychologist and the study itself (where possible), and should be no more than 750 words. You should bring this to your first psychology lesson.

Task 4

You will also be having a maths test at the beginning of the course. You should prepare for this test by revising your GCSE maths content – percentages, fractions, decimals, averages and graphs.
